Publications of the Bay of Bengal Programme (BOBP)

The Bay of Bengal Programme (BOBP) has brought out the following types of publications.

Newsletters (Bay of Bengal News) which are issued quarterly and which contain illustrated articles and features in non-technical style on BOBP work and related subjects.

Reports (BOBP/REP/...) which describe and analyze completed activities such as seminars, annual meetings of BOBP's Advisory Committee, and subprojects in member-countries for which BOBP inputs have ended.

Working Papers (BOBP/WP/...) which are progress reports that discuss the findings of ongoing work.

Manuals and Guides (BOBP/MAG/...) which are instructional documents for specific audience.

Information Documents (BOBP/INF/...) which are bibliographies and descriptive documents on the fisheries of member-countries in the region.

Miscellaneous Publications which include books and other miscellaneous reports.

Post-Harvest Fisheries Publications which include newsletters, information bulletins and leaflets.

Other materials which include posters and brochures.

A complete list of these publications (as of July 1999) will be found in the pages that follow. Those marked with an asterisk (*) are out of print, but photocopies can be supplied.

9. **Sri Lanka's Offshore Fisheries**
Educational film on the evolution of offshore fishing in Sri Lanka and the problems and opportunities that arose from this development. [1989,30 min.] Produced for BOBP by WIF, Colombo.
10. **Cleaner Fishing Harbours in the Maldives**
Status of fishery harbour pollution in the Maldives [1990,7 min.]
11. **Therukoothu**
The traditional dance-drama form of Tamil Nadu (South India) is now being used to educate rural audiences on health, hygiene, environment and social welfare. Here, a fisherfolk troupe reaches out to a fishing village audience. [1991, 13 min.]
12. **The Canoes of Nias, Indonesia**
The Bay of Bengal Programme undertook to develop a new type of outrigger canoe in Nias Island, Indonesia, west of Sumatera, and assess its technical and economic feasibility. This film describes the project and features the canoe, whose feasibility for the small-scale fisherfolk of Nias was established after two years of trials. Local carpenters trained during the project have begun building improved outrigger canoes. [1991,9½ min.]

13. **Extension Services in Ranong**

As fishing grows as an industry in Thailand, the lot of the small-scale fisherfolk worsens in communities like this one in Ranong, on a picturesque coast by the Andaman Sea. BOBP teamed with Thai Government Extension Services to alleviate the problems of one such community. Aquaculture was encouraged, post-harvest training provided and income-generating activities for womenfolk introduced. [1991, 18% min.]

14. **Good Fish, Good Quality**

In India's deep south, the fish catch is good. But partly due to ignorance, partly due to a lack of capital, incomes are low in many of the fishing communities. The BOBP Post-Harvest Fisheries Project's introduction of ice boxes, drying racks and newly designed fish containers have gone a long way towards adding considerably to the income of fisherfolk. [1991, 23 min.]

15. **Mognamapara - A Case of Appropriate Technology**

In Mognamapara, southern Bangladesh, a BOBP-sponsored NGO has helped an impoverished group of landless fisherfolk to organize themselves and enhance their income through the use of nursery cages for the shrimp fry they catch. The involvement of the whole family has been emphasized. Even the womenfolk participate in this and other income-generating activities. [1991, 14 min.]

16. **Better Feeds for Better Shrimp**

The Indian Government has been encouraging pond-rearing of shrimp near the backwaters of coastal states. The BOBP's Post-Harvest Project has studied the feed used by shrimp farmers of Andhra Pradesh use and helped develop better-quality, water-stable shrimp feed. Result : high shrimp survival in the pond-farms. [1991, 18 min.]

17. **Prawn Seed Production in Bangladesh**

The BOBP had developed a shrimp hatchery in Potiya, southern Bangladesh, to increase the supply of shrimp seed in the area and to serve as a model for other parts of the country. An NGO working with BOBP has encouraged local fisherfolk to take the next natural step : go into nursery cage culture. The seed the nursery is unable to handle helps local seed-collectors increase their incomes. [1991, 16½ min.]

18. **Pollution in Fishing Harbours of the Bay of Bengal**

Towards cleaner fishery harbours in the Bay of Bengal. [1992, 7 min.]

19. **Better Days in the Bay**

This film reviews and analyzes the work of the Beachlanding Craft Development subproject. It briefly describes the development of these craft and their introduction on the east coast of India, analyses their present status and discusses the results. [1992, 30 min.]
